

PVC Bailers

Rice rigid PVC bailers are manufactured from white or clear PVC pipe and are designed to fit inside 2" monitoring wells. The overall length of the bailer is 15 3/4", which includes a 12" reservoir body. A 1" Teflon ball fits inside the tip to prevent fluid loss. The outside diameter of the bailer is 1.66" and the inside diameter is 1.3". Additional 12" extensions are also available.

FEATURES:

- All threaded assembly (no contamination by glues or resins)
- Easily disassembled for cleaning
- Durable
- Re-usable

OPTIONS:

- White or Clear PVC
- 12" threaded extensions
- Fluid extractors to thread into ball check valve for draining sample into containers
