

## SINGLE SAMPLE BAILERS

Want to save time in the field and work smarter? Use the improved Single Sample® Disposable Polyethylene Bailers. Features include stainless steel weight design and improved top so they fill and empty as fast as or faster than any other bailer on the market. Standard disposable bailers feature dome design top and bottom to better facilitate well entry and removal. They also help prevent well casing debris from contaminating the sample as the bailer is removed from the well.

### ADVANTAGES AND FEATURES INCLUDE:

- All threaded assembly (no contamination by glues or resins)
- Special Dome design top and bottom avoids hang-ups from shifted well casing.
- Rugged, high density, inert polyethylene.
- Each unit is individually decontaminated with Liquinox washing and DI water rinse
- Ready to use
- Non-reactive components
- Individually sealed packaging
- PVC ball
- approximately 1 Liter capacity (1.5" model)
- 36" overall length
- 0.031" wall
- 0.75", 1.5" & 3" outside diameter
- Friction fit nozzle for easy, no-splash sample removal
