

DIRECT READ CABLES

Direct Read Cables are available for attachment to any Levellogger, new or old, in standard lengths of: 50', 100', 200', 300', 500', 15m, 30m, 60m, 80m, and 100m. Custom cable lengths up to 1640 ft. (500m) are also available, to fit particular monitoring situations, as required. Cable markings, each 5 ft. or one meter, may be requested, for situations where the direct read Levelloggers need to be used in a variety of locations.

The 1/10" diameter. (2.54 mm) cable has an HDPE outer jacket for strength and durability. The stranded stainless steel central conductor gives non-stretch accuracy.

The upper end of the direct read cable is fitted with a connector that can act as a well cap for a 1" well. This connector fits into Solinst Levellogger well caps designed for 2" or 4" wells, and can easily be attached at the surface in other applications.
